Thanks for the heads-up! I should have asked this before you left, but did you use slides? Can I take a peak so I can get a feel for what ground was covered? And are they of the nature that, if asked, it would be ok to provide to reporters?

No one has reached out yet, but I will keep you posted as well as keep an eye out for coverage...

I got swarmed by trade press after the talk and referred all of them to OPA/Justin. But likely there will be stories based on my talk. I did get the sugarcane vs corn question while I was on stage (they did not take qs from audience but Chuck Knauss asked me a couple questions as moderator).
